SELECTED CONSULTING PROJECTS

Comparison of Shipping Costs by Port and Transportation Mode. Developed estimates of container shipping costs between Tacoma and three Alaskan ports; Anchorage, Seward, and Whittier; and assessed trucking and rail costs for transporting a container from Seward or Whittier to Anchorage. Study prepared for the Port of Anchorage.

Western Alaska Community Development Quota Study. Developed per capita and per household income data for selected years for sixty-five communities. Prepared for the Alaska Department of Community and Economic Development.

Gravina Access Project: Economic Impact Assessment-Draft. Contributed to the assessment of the economic impacts of proposed bridge and ferry service alternatives between Gravina and Revilla Islands in southeast Alaska. Developed estimates of displacement costs, traffic impacts, and potential allision costs for the project. Prepared for the Alaska Department of Transportation and Public Facilities.

Gravina Access Project: Cost-Benefit Analysis of Gravina Transportation Plan Alternatives, Technical Memorandum-Draft. Developed estimates of right-of-way acquisition costs and potential allision costs. Prepared for the Alaska Department of Transportation and Public Facilities.

Socioeconomic and Environmental Impacts of Paving Gravel Roads. Developed and wrote the socioeconomic portion of the study on low-volume, gravel and paved roads in Alaska. Included sections on traffic safety and the economic impact of paving operations on local communities and the state. Prepared for the Alaska Department of Transportation and Public Facilities.
